A Report to The Alumni

ROBERT BLACKWELL SMITH, JR.

As the Medical College of Virginia approaches the 125th anniversary of the granting of its charter, as the Medical Department of Hampden-Sydney College, gratifying progress is being made in augmenting and marshalling its resources in order to provide the teaching talent and facilities which will be indispensable in meeting the obligations, opportunities, and challenges of the years immediately ahead.

The progress to date has been made possible through increased interest in and appropriations in behalf of the College on the part of the General Assembly of Virginia. With this indispensable foundational support increasingly generous in its extent, other support has followed from interested citizens, who have given freely, and from private and governmental sources, which have seen in the College an opportunity to contribute broadly to the health of Virginians and others throughout our country and beyond.

Interested citizens, our alumni among them, may well feel that such assertions of progress should be accompanied by a more detailed accounting of stewardship on the part of those entrusted with the College's welfare and, therefore, its ability to fulfill its assigned missions. We have often invited and have always welcomed visits to the institution by all alumni and other interested and responsible citizens, for such visits provide the best of opportunities for learning about current activities and plans for the future. As a substitute in behalf of the many who cannot make such visits, we have reported frequently through THE SCARAB and regularly through the Annual Report of the College. Copies of the latter publication are widely distributed and also are available upon request to the Information and Publications Officer, Miss Thelma Vaine Hoke. Despite these efforts, it is difficult to present a complete picture; and in the paragraphs which follow an effort will be made to highlight certain points which appear particularly pertinent at this time.

The College has lead the way in Virginia in planning to meet the growing need for physicians and to provide opportunities for the expected enlarged number of qualified Virginians who will wish to prepare for the professions of medicine, dentistry, pharmacy, nursing, and the related professional areas.

Ten years ago the *school of dentistry* occupied its new building which provides facilities not only for all qualified Virginians but also for others who come from Florida and South Carolina under the Southern Regional Educational Compact. As the number of qualified Virginians grows, they can be assigned the built-in reserve space now occupied by others. Removal of the school of dentistry from McGuire Hall and additions to this structure provided similar opportunities for the *school of pharmacy*, as have facilities provided for the *school of nursing*.

Some years ago it became apparent that additional faculty members must be recruited and additional physical facilities must be provided if the *school of medicine*, the oldest and largest of our schools and the central activity of our medical center, were to be enabled to do its part in meeting Virginia's need for physicians and the needs of Virginians who wish to become physicians.

During the latter thirties, prodigious and devoted efforts on the part of President Sanger and the Board of Visitors, along with the aid of others, made possible the erection of the M.C.V. Hospital and the A. D. Williams Memorial Clinic with their excellent clinical resources, resources later augmented through the erection of the Ennion G. Williams Hospital and the improvement of the Memorial and St. Philip Hospitals. Improvements in the facilities available to the preclinical or basic science departments were limited by the availability of disproportionately smaller sums with the result that the College had available facilities for in excess of 100 junior and senior medical students but only an absolute maximum of 84 entering freshman and sophomore students. Despite the limited capacity of the preclinical facilities, fuller use of the clinical resources for third and fourth year medical students was made possible through the pioneering interstate compact with West Virginia under which students from the two-year medical school of West Virginia University transferred to the Medical College of Virginia for the third and fourth years of their medical education. With this pattern of utilization of our resources, medical school enrollment reached a top figure of 372 in 1954, when the maximum impact of veteran student enrollment under the G. I. Bill of Rights was reached. At this point the demand for admissions to medical school was so great that the ratio reached 10 to 1, as the backlog of mature veterans whose educations had been delayed by war clamored for entrance.

About this time, other factors entered the picture. West Virginia began its plans for a four-year medical school, and the pressure for admissions noted above made it clear that in order to accommodate more medical underclassmen and to utilize the clinical resources soon to be vacated by the inevitable withdrawal of the West Virginia upperclassmen, additional physical facilities would be required. A further and impelling factor pointing up the need for the accommodation of a large medical student body was the tremendous upsurge in the birth rate with the advent of World War II and the continuance of unprecedented population growth.

(Continued on page 17)

The School of Nursing in Review

Prepared by Dr. Doris B. Yingling and Members of the Faculty

An opportunity to describe the development and growth of the school of nursing through the medium of The Scarab is both a responsibility and a challenge. It is a responsibility because we feel our report should be presented adequately; it is a challenge because we feel the growth and development have been vast and exciting. The following paragraphs will review the nursing education effort from its inception, describe the present programs, explain the accreditation process, and project some thoughts for the future.

History

The first nurses to appear in the history of the Medical College were Sisters of Charity, later followed by Sisters of Mercy. These Sisters were replaced by student nurses in 1895 when the first training school was organized in the Old Dominion Hospital, the institute in which medical students received clinical teaching.

In 1903 the Memorial Hospital was formally opened as the teaching unit of the College. At that time the Old Dominion Hospital was abandoned and the student nurses were transferred to the Memorial Hospital, where they constituted the nucleus of the school of nursing. For a number of years the school was maintained under the name of the Memorial Hospital Training School for Nurses. Gradually, however, a closer association with the College administration developed, and in 1914 the diplomas issued to the nurses bore the name of the Medical College of Virginia. Thus the Medical College of Virginia School of Nursing came into existence.

This diploma program, with a few minor changes, was in continuous operation until 1953 and received, in addition to full State approval, accreditation by the New York Board of Regents, the National League for Nursing Education, and the National Nursing Accrediting Service. Minutes of the meetings of the Virginia State Board of Nurse Examiners show that the first inspection of schools, by a person appointed for that purpose, was made in 1918. The minutes state further that the outline of the curriculum in effect at the Medical College was accepted as the standard by which other Virginia schools were measured.

The year 1925 was one of great significance in the history of the entire Medical College of Virginia. In that year a new president, Dr. William T. Sanger, was appointed. He gave the College inspired leadership for a period of thirty-one years. The impact of Dr. Sanger's knowledge and understanding of nursing education has been felt not only at the Medical College but in many other institutions throughout the United States.

In 1925 the Board of Visitors of the College formally recognized the school of nursing as coordinate with the schools of medicine, dentistry, and pharmacy, and created the title of dean of the school of nursing. The dean functioned as both dean and director of the nursing service until 1946, at which time two separate positions were established.

Since Dr. Sanger's retirement in 1956, President R. Blackwell Smith, Jr., has provided the same outstanding leadership, which is both idealistic and practical. Under his administration, the school of nursing enjoys a highly desirable degree of freedom of operation and, at the same time, receives recognition as an important part of the College community, active support of its programs, and valuable assistance in the solution of problems as they arise.

Between the years 1942 and 1953 the school of nursing offered, in addition to the diploma program, a curriculum leading to the degree of bachelor of science in nursing. Students were eligible who had completed two years of selected liberal arts courses in an approved college or university prior to admission to the school of nursing. This program, however, was never accredited by the National League for Nursing.

During this period plans were made for the inauguration of a four-year basic nursing program leading to the degree of bachelor of science in nursing. In 1952 the Board of Visitors approved the termi-

Cabaniss Hall, nursing dormitory, built in 1928

nation of the diploma program and the five-year degree program in favor of the proposed four-year degree program. The first class to complete this program graduated in June, 1957.

The year 1958 saw the initiation of a two-year associate degree program. It was established with its own objectives, faculty, and centralized teaching unit. The first students to receive the degree of associate in science in nursing were graduated in June, 1960.

At the present time, enrollment in the school totals 213 of which 178 are enrolled in the baccalaureate degree program and 35 are enrolled in the associate degree program.

The Baccalaureate Degree Program

As early as 1951, faculty and administrative personnel were reviewing plans for the formation of a four-year basic collegiate program. In order to grant a bachelor of science degree with a major in nursing, an appropriate ratio of academic and nursing courses had to be provided. Originally, the program consisted of three-calendar years and one-academic year; thus students completed the program in June of the senior year and were graduated with all requirements fulfilled at the regular College commencement exercises. Perquisites, in the form of room and board, were allowed students in return for a certain amount of service to the hospital. This practice from the diploma program was incorporated into the baccalaureate degree program to facilitate the transition process for both the students and the hospital.

In the spring of 1958, faced with a major effort to achieve national accreditation status for the program which had not been thus accredited since its inception, the faculty and students, under the direction of the dean, undertook a major study and evaluation of the curriculum. The present curriculum plan which evolved from this study was approved by the Board of Visitors in 1959; and, while it does not change the intent of the four-year program, it does incorporate several innovations with respect to nursing education. Among these is a reduction of total time for the program. As of September, 1960, students undertook a program of four-academic years, including summer sessions at the end of the sophomore and junior years, thereby eliminating the summer session at the end of the freshman year. The faculty believes that this is advantageous for the students because they now have an opportunity to make up failures and remain in the program, and they can be employed during the summer—an important factor in view of the financial cost of the program. The length of the program, moreover, is more in line with other college programs offering baccalaureate degrees. Two summer sessions have been retained because the faculty believes emphatically that this amount of time is necessary in order to assure sufficient clinical practice in the patient care areas. The summer sessions make possible utilizing the teaching facilities the year around.

Another innovation requires students to pay tuition, other fees, and room and board throughout the four years of the program, thereby eliminating perquisites.

Students now are assigned to the clinical areas on the basis of hours per credit for each course. The faculty of the school decided upon a fairly high ratio of hours per credit. Again, emphasizing their concern for sufficient time for students to learn well the principles of patient care, the faculty decided to assign students in the hospital at any hour during the day, evening, or night deemed desirable for their best learning experiences. Only those evening and night assignments have been eliminated which cover long periods of time. Since we feel it is important for faculty to be with the students at all times to insure optimum learning in the clinical

Randolph-Minor Hall, nursing dormitory, built in 1952

laboratory, they are available during all clinical assignments, regardless of the hours.

The curriculum has been planned to allocate approximately 50 per cent of the total credits to general education subjects, including the basic sciences and the humanities, and 50 per cent to the nursing major. The present curriculum now includes a total of 202 quarter-hour credits or 134 semester-hour credits. The following chart shows the specific courses which comprise the baccalaureate degree curriculum.

Classification of Courses According to General Education and Nursing Education, Baccalaureate Degree Program

GENERAL EDUCATION

Course	Credit
BIOLOGICAL & PHYSICAL SCIENCES	
General Biology	10
General Chemistry	15
Anatomy and Physiology	10
Microbiology	4.5
Genetics	4.5
ENGLISH	
Composition, Grammar, and Literature	9

Nursing of Children	9
Obstetric Nursing	8
Operating Room Nursing	6
Psychiatric Nursing	8
Principles of Administration	5
Nursing History and Trends	4
Disaster and Emergency Nursing	3
Public Health Nursing	10
TOTAL	108

Another important aspect of the baccalaureate degree program is the public health nursing component. One quarter of the senior year is devoted to study and clinical experience in a State or city health department; students live in health centers within a 75 mile radius of the College. During this quarter, one of three full-time faculty members, qualified in public health nursing, supervises the students in the health center location. Because of the inclusion of this component, graduates are now fully qualified to accept positions in the field of public health nursing.

One hundred eighty-two students have graduated from the present generic program. Members of the faculty often wish that each of these graduates might assist in evaluating and improving the program. Usually such a desire is difficult to achieve; but fortunately, as a result of Dr. Jean Hayter's study, each graduate prior to 1961 was given an opportunity to express her individual point of view about the value of the program. In addition to a detailed questionnaire sent each graduate, employers were asked to complete another questionnaire. The wonderful response—in the mid-ninetieth percentile—of each class has provided a wealth of material from which much important information has been obtained. Interestingly enough, analysis of the returned questionnaires indicates a high correlation between the objectives of the program and the ability of our graduates to perform well in the employment situation. Because of the interest and value of the study, we hope to publish an abstract of it at a later date.

For the senior student in cap and gown, Susan Brown, N'62, graduation climaxes a year which includes clinical experience in the hospital, Shirley Thomas, N'62, in white uniform, and in the home and community, Nancy Stansell, N'62, in the uniform of the public health nurse.

The Associate Degree Program

The associate degree program was developed in an effort to meet the ever-increasing demand for more graduate nurses. The plan for this program follows closely that developed by a Cooperative Research Project conducted by Teachers College, Columbia University, under the auspices of the National League for Nursing and the American Association of Junior Colleges. This project explored ways in which junior colleges could participate more effectively in nursing education. As a result of the success demonstrated by the five experimental schools participating in the project, the associate degree program has developed rapidly in popularity and achievement throughout the country. Today there are fifty-six such programs in the United States. Ours is one of the six nationally accredited programs.

The curriculum for our program is so planned that the student in two-academic years and one summer session meets all the requirements for an associate degree in science and becomes eligible to write the State Board Examinations for registered nurse licensure. The program is not to be considered a shortened diploma program or a watered-down baccalaureate degree program. The program is an integral part of the school of nursing and it operates entirely within the framework of the philosophy of the school and the College. The main objective is to prepare good practitioners of bedside nursing. General education subjects and nursing subjects are included in the curriculum. The following summary shows the courses which are included in the associate degree program.

Curriculum Plan of the Associate Degree Program

FIRST YEAR

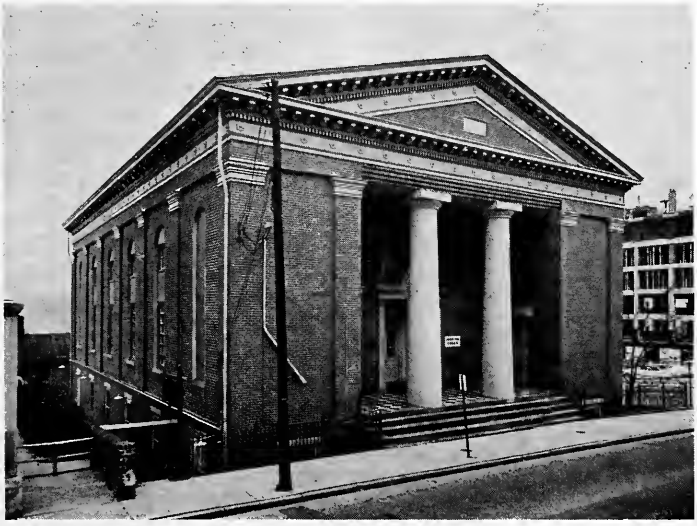
Fall Quarter	Credit
Fundamentals of Nursing	6
Basic Science (Physics)	7
English Composition	3
General Sociology	3
Winter Quarter	
Medical-Surgical Nursing I	6
Basic Science (Anatomy & Physiology)	7
English Composition	3
General Sociology	3
Spring Quarter	
Medical-Surgical Nursing II	6
Basic Science (Chemistry & Biology)	7
English Composition	3
General Sociology	3
Summer Quarter	
Marriage and the Family	3
Clinical Nursing (assigned one of the following)	10
Nursing of Mothers and Infants	
Medical-Surgical Nursing	
Nursing of Children	
Psychiatric Nursing	
Total	70

SECOND YEAR

Fall Quarter	Credit
General Psychology	3
Philosophy of Religion	3
Nursing and Society I	1
Clinical Nursing	10
Winter Quarter	
Child Psychology	3
Philosophy of Religion	3
Nursing and Society II	1
Clinical Nursing	10
Spring Quarter	
Psychology (Mental Hygiene)	3
Philosophy of Religon	3
Nursing and Society III	1
Clinical Nursing	10
Total	51

The faculty is free to select the best learning experiences found in our various clinical facilities. Every effort is made to hold repetition in teaching to a minimum as the student moves forward in the various clinical areas of her nursing laboratory experience. This kind of teaching requires careful and cooperative planning on the part of the faculty.

Randolph-Minor Annex, the remodeled old First African Church, used to house the teaching facilities of the associate degree program and the school of medical technology in the basement.



From the left, the associate degree program appeals to a young high school graduate, Dorothy Thorpe; a mother, Mrs. Martha Harden; and a grandmother, Mrs. Evelyn McCoy.

Students in the program enjoy full College status and have the privilege of sharing in all campus activities enjoyed by other students. Although the majority of the students come directly from high school, the program has appealed to college graduates, married students, and other women beyond the usual college age. Although we think of this as a terminal program, nothing precludes the graduate from continuing her education in the future if this is her desire.

Two classes have been graduated from the program. The forty-two graduates are, for the most part, making a valuable contribution to nursing. The faculty has completed a follow-up study of these graduates, the results of which have been most gratifying.

Faculty

Alumni will be interested to know the size and qualifications of our present faculty because it is due to this group that the quality of our programs has been maintained. At the present time, the full-time nursing complement is made up of twenty-six registered nurses, not including the dean. Eighteen of these members teach courses essentially planned for the baccalaureate degree program; the remainder teach the nursing subjects of

MAIL BALLOTS FOR

Wyndham Bolling Blanton, Jr.

Born: Richmond, Virginia, where he still resides.

Schools and colleges attended: Williams; Hampden-Sydney; U. of Va.; U. of Richmond; MCV, school of medicine, class of '50.

Professional data: Asst. to dean of med., '52-'56; Interim Comm. of Deans, '56-'57; asst. dean of med., '57-'60, MCV. Research activities in pulmonary physiology, '54-'60; attending staff at Stuart Circle and MCV Hosp., courtesy staff at Rich. Mem., Retreat for the Sick, and Sheltering Arms Hosp.; attending phys. Home for Incurables.

Professional memberships: Richmond Soc. of Int. Med., Richmond Acad. of Med., Med. Soc. of Va., A.M.A., Assoc. of Am. Med. Col., Am. Col. of Chest Phys., Am. Trudeau Soc., N. Y. Acad. of Science, Am. Assoc. for Advancement of Science, Am. Assoc. of Railway Surg., So. Med. Assoc., Am. Heart Assoc.

Hobbies and Club Memberships: breeding pure bred Holstein cattle on a dairy farm in Cumberland County, Country Club of Va., and The Richmond Assembly.

Russell V. Bowers

Born: Canon, Ga., now a resident of Richmond, Va.

Schools and colleges attended: A.B., Lynchburg Colleges; MCV, M.S. '37, school of medicine, class of '50.

Professional data: general practice, Richmond, Va., interned MCV and Stuart Circle Hosp.

Professional memberships: Rich. Acad. of Med.; Hanover Med. Soc.; Va. Med. Soc.; Sou. Med. Soc.; Theta Kappa Psi, medical fraternity; Alpha Omega Alpha, honorary fraternity.

Hobbies and club memberships: Fishing and hunting; Downtown Club; Va. Hist. Soc.; Advisory Bd., Rich. Hist. Found.

Honors received: Vice-chm. Henrico Civil War Commission, medical rep. to the Selective Service Bd. of Appeals for E. Va.

Saul Krugman

Born: New York City, where he still resides.

Schools and colleges attended: Paterson H. S.; Ohio State U.; U. of Richmond; MCV, school of medicine, class of '39.

Professional data: Prof. and chairman, dept. of pediatrics, N.Y.U. school of medicine; director, pediatric service, Bellevue Hospital; director, pediatric service, University Hosp., N. Y.

Professional memberships: Am. Pediatric Soc., Soc. for Pediatric Research, Am. Acad. of Pediatrics, The Harvey Soc., N. Y. Acad. of Med.

Honors received: Coauthor, text by Krugman and Ward, *Infectious Disease of Children;* member Comm. on Viral Infections; Armed Forces. Epidemiological Bd.; consultant, USPHS; chm. Pediatric Test Comm. Nat. Bd. of Med. Examiners, 1961.

Fletcher Lindsay Raiford

Born: Sedley, Va., now a resident of Hendersonville, N. C.

Schools and colleges attended: Southampton County Va. schools; Franklin, Va. H.S.; Westtown School, Pa.; U. of Richmond; MCV, school of medicine, class of '41.

Professional data: Solo practice of pediatrics, Hendersonville; staff, Margaret R. Pardee Mem. Hosp.; member Co. Bd. of Health, Henderson Co., N. C.

Professional memberships: A.M.A., N. C. State Med. Soc., Henderson Co. Med. Soc., N. C. State Pediatric Soc., Am. Bd. of Pediatrics, A.A.P.

Hobbies and club memberships: fishing, hunting, woodworking; V.F.W.

Honors received: ODK, U. of Richmond.

Thomas Clarke Bradshaw

Born: Burkeville, Va., now a resident of Blackstone, Va.

Schools and colleges attended: VPI; MCV, school of dentistry, class of '35.

Professional data: Private practice of dentistry in Blackstone since '35.

Professional memberships: A.D.A., Va. State Dental Assoc., Southside Va. Dental Soc.

Hobbies and club memberships: Blackstone Rotary Club, farming and fishing.

Honors received: O.K.U., honorary fraternity, '35; F.A.C.D., Philadelphia, Pa., '61; vice-president First Nat. Bank, '57-'61, Blackstone, Va.

John Buxton Todd

Born: Newport News, Va., where he still resides.

Schools and colleges attended: Newport News H. S.; College of Wm. and Mary; MCV, school of dentistry, class of '32.

Professional data: private practice of dentistry, Newport News, Va.

Professional memberships: Va. State Dental Assoc., A.D.A., Pierre Fauchard Academy, Federation Dentaire International, Am. Soc. of Dentistry for Children, Chi-

LEST WE FORGET

1898 Foushee O. Mooklar (D), of Reedville, Virginia, died July 27, 1961.

1906 T. Brantley Henderson (M), of Maitland, Florida, died October 22, 1961, at Williamsburg, Virginia. He had practiced in Richmond and Williamsburg as a general practitioner and in later years as an eye, ear, nose, and throat specialist.

1911 Mrs. Lillion Stryker (N), of Richmond, Virginia, died October 9, 1961.

1913 Posey L. Choate (M), of Winston-Salem, North Carolina, died May 16, 1961.

1913 (NCMC) Rupert S. Helsabeck (M), of Winston-Salem, North Carolina, died July 5, 1961.

1915 Cornelius Byrd Courtney (M), of Newport News, Virginia, died August 21, 1961, after a long illness. He had practiced there since 1919 and retired from the staff of Riverside Hospital in January of last year.

1916 (NCMC) James E. Bangle (M), of Concord, North Carolina, died April 15, 1961. He was on the staff of Cabarrus Memorial Hospital.

1918 Max W. Miller (D), of Alderson, West Virginia, died on August 26, 1961.

1919 Emory F. Hodges (D), of Petersburg, Virginia, died on December 26, 1961. He was chief of the dental staff of Petersburg General Hospital and also on the staff of the nursing school. He had served on the Board of Dental Examiners and was a former president of the Petersburg Dental Society and the Southside Dental Society. Dr. Hodges was a fellow of the American College of Dentists and had served on the executive council of the Virginia State Dental Society and as a delegate to the A.D.A.

1922 George W. Parson (M), of Texarkana, Texas, was drowned on Sunday, December 17, 1961, near Fulton, Arkansas. He was chairman of the department of internal medicine at the Southern Clinic in Texarkana, Texas.

1923 William B. Sherrod (D), of Winston-Salem, North Carolina, died on December 7, 1961.

1924 Wesley Grimes Byerly (M), of Lenoir, North Carolina, died October 23, 1961. He practiced eye, ear, nose, and throat and was on the staff of the Caldwell Memorial Hospital there. He was a past president of the Catawba Valley Medical Society and the Ninth District Medical Society and had been district director of the C.C.C. from 1932-1939.

1927 Percy P. Pharr (M), of Gap Mills, West Virginia, died January 23, 1961.

1928 James Peery Williams (M), of Richlands, Virginia, died on October 30, 1961. He was owner and chief surgeon of the Mattie Williams Hospital in Richlands and the Grundy Hospital in Grundy. He was president of the First National Bank in Richlands and a former member of the Town Council.

1930 A. Wilson Brown (M), of Port Charlotte, Florida, died on October 5, 1961.

1931 Henry Cannon Spalding (M), of Richmond, Virginia, died on November 16, 1961. He was a fellow of the American College of Obstetricians and Gynecologists and was associate professor of obstetrics and gynecology at MCV.

1932 Stephen Casagrande (M), of Rumson, New Jersey, died on October 7, 1961.

1936 C. Raymond Arp (M), of Atlanta, Georgia, died on October 5. He was a diplomate of the American Board of Internal Medicine and was an associate in medicine at Emory University's school of medicine. Dr. Arp served in the Army as a captain during World War II and was awarded the bronze star for rescuing a fellow officer under enemy fire.

Cliff Polsgrove Berger (M), of McLean, Virginia, died on September 30. He was assistant pathologist at Sibley Hospital.

1937 Alfred W. Norris (M), of Hastings, Florida, died on April 19, 1961. He was associated with the Putnam Memorial Hospital at Palatka.

1938 Liskie Jay Moore (M), of Huntington, West Virginia, and his wife, Nelle, died instantly in a head-on collision near Ravenswood on October 29. They were returning from the annual Postgraduate Institute in Martinsburg. Dr. Moore was vice-president of the West Virginia Chapter of the American Academy of General Practice.

Mary Kuykendall Palmer (N), of Alexandria, Virginia, died on December 6.

Class News

1899 Archibald Osborne (M), of Berryville, Virginia, and his wife recently celebrated their 60th wedding anniversary. He closed his office last fall but continues to see a few patients at home.

1911 E. S. Carr (M), of Narrows, Virginia, was honored at a reception given by his friends and patients to commemorate his forty-eight years "of service to mankind."

1914 Kenneth Graves (M), of Roanoke, Virginia, was a panelist at the Southwest Medical Society meeting at Radford in September.

Nelson Mercer (M), of Washington, D. C., retired on November 30, 1961, after many years of Federal service in the Army and as a medical officer of the U.S. Civil Service Commission. However, he will continue on active duty in the same position in the medical division of the Commission.

1922 L. V. Morgan (P), of Gloucester, Virginia, has been elected to the Board of Directors of the Bank of Gloucester. He is also on the Board of Gloucester's new Francis N. Sanford Nursing Home.

1923 Harry Lyons (D), of Richmond, Virginia, has been appointed vice-president, director, and trustee of the recently established Fund for Dental Education, Inc. He was also elected vice-president of the American Academy of the History of Dentistry.

Leland S. Mabry (D), of Fork Union, Virginia, visited the Alumni House on October 26.

1924 Stanley Gray (P), of Gloucester, Virginia, has been elected to the Board of Directors of the Bank of Gloucester. He also serves on the Board of the Francis N. Sanford Nursing Home.

1927 W. Linwood Ball (M), of Richmond, Virginia, was re-elected as a delegate to the AMA by the Medical Society of Virginia.

F. U. Metcalf (M), of Rockville Center, New York visited the Alumni House on November 14.

1928 Garrett Dalton (M), of Radford, Virginia, was elected to the Executive Committee of the Southwest Virginia Medical Society.

William N. Thompsan (M), of Stuart, Virginia, was elected a councilor of the Medical Society of Virginia at the recent Medical Society of Virginia meeting.

1929 A. Ray Dawson (M), of Richmond, Virginia, was elected to the Board of Directors of the National Rehabilitation Association at their meeting in San Francisco in October.

R. M. DeHart (M), of Marion, Virginia, visited the Alumni House on October 23, 1961.

1930 Willow S. Bernard (Diet.), of Georgetown, Delaware, is the administrative dietician at the Hospital for the mentally retarded at Stockley, Delaware.

Bernard A. Brann (D), of Leesburg, Virginia, was named a fellow of the American College of Dentists.

Elizabeth Ryan (N), of Richmond, Virginia, spoke on "The Nursing Care of the Patient with Long-Term Illness" at the inservice program of the public health nurses at Harrisonburg, Virginia on October 24.

1931 Carl W. LaFratta (M), of Newport News, Virginia, has been named assistant chief of the department of physical medicine and

What's New?

The Fifth Annual Scientific Assembly

Here's the program for the Scientific Assembly on the first day of June. As you can see, we have endeavored by the "What's New" to keep you up to date on what's happening at the school and what's happening in certain selected phases of medicine. We believe that you will hear something really useful, worthwhile, and interesting from the speakers. In addition, question and answer periods have been set aside when we hope that you will discuss any particular aspects of the problem presented with the essayists.

We think that we have established a program that should appeal to everyone regardless of his type practice or special interests.

Looking forward to seeing you on the front row!

W. T. THOMPSON, M'38, *Chairman*

Scientific Assembly Program

June 1, 1962

9:00	Registration
9:30-10:30	*WHAT'S NEW IN THE SCHOOL OF MEDICINE*—Moderator: Dean William F. Maloney *WHAT'S NEW IN DIAGNOSIS AND TREATMENT*—Moderator: Dr. H. Hudnall Ware, Jr.
10:30-10:45	Electromyography in the diagnosis of neurologic and myopathic disease: Dr. Cary G. Suter
10:45-11	Physical agents in office practice: Dr. Frederick E. Vultee, Jr.
11-11:15	Hypoglycemia of the newborn associated with toxemia of pregnancy: Dr. Gerard B. Odell
11:15-11:30	Coffee break and individual discussion
11:30-	Second Annual Alumni Lecture—The speaker will be announced at a later date
12:30-2	Lunch *CARDIOVASCULAR SYMPOSIUM*—Moderator: Dr. Kinloch Nelson
	DIAGNOSTIC TECHNIQUES
2-2:10	Vectorcardiography: Dr. John L. Patterson, Jr.
2:10-2:20	Radioisotopes: Dr. Alton R. Sharpe, Jr.
2:20-2:30	Demonstration of coronary circulation: Dr. V. Eric Kemp
2:30-2:45	X-ray in the diagnosis of rheumatic valvular disease: Dr. Richard G. Lester
2:45-3	Question and answer period with the above essayists as panelists
3-3:15	Coffee break and individual discussion
	THERAPY
3:15-3:30	Current status of anticoagulant therapy: Dr. Reno R. Porter
3:30-3:45	Drug therapy of hypertension: Dr. David W. Richardson
3:45-4	Surgical treatment of arterial vascular disease: Dr. David M. Hume
4:-4:15	Question and answer period with the above essayists as panelists

'Round The Circuit

Tidewater Chapter

The Norfolk Chapter of the Alumni Association of MCV met on October 18 at the Norfolk Yacht and Country Club. Dr. K. K. Wallace, M'32, the president, was the able chairman of this delightful affair.

With a goodly group of alumni in attendance, the cocktail party was enjoyed by all as stories were swapped back and forth, following which, there was a delicious roast beef dinner. From Richmond for the occasion were Dr. W. C. Henderson, D'37, president of the Alumni Association; Dr. William F. Maloney, dean of medicine; Dr. John J. Salley, D'51, professor of oral pathology and chairman of the department; Dr. Milton L. Neuroth, professor of pharmacy and pharmacology; and Miss Minnie M. Franck, executive secretary. They brought news of the Association and College.

The capable slate of officers elected for the coming year are Dr. John J. O'Keefe, Jr., D'30, president; Mr. Bernard Behrman, P'29, president-elect; and Mr. David B. Schwetz, P'24, secretary-treasurer.

With the business of the evening concluded, Dr. O'Keefe introduced members of the William and Mary Opera Workshop who entertained with selections from "South Pacific," "The King and I," and "Camelot."

Delaware Valley Chapter

Meeting on October 25 at historic old Bookbinders, the Delaware Valley Chapter gathered together its loyal core of alumni in the area. This famous old restaurant is noted for its food and lived up to its reputation. Dr. Ulric J. Laquer, M'49, of Cape May Court House, New Jersey, president, was chairman for the meeting.

The Richmond delegation consisted of Dr. W. C. Henderson, D'37, president of the Alumni Association, and Mrs. Henderson; Dr. William F. Maloney, dean of medicine; Dr. Beverley B. Clary, M'39, assistant clinical professor of orthopedic surgery, and Mrs. Clary; and the executive secretary. Dr. Henderson told the group of the progress of the Association and Dr. Maloney explained the new curriculum.

The Delaware Valley Chapter awards each year to the outstanding student in one of the four major schools of the College one of the black armchairs with the MCV seal in gold. The 1961 recipient was Howard Eugene Quillen, of Gate City, Virginia. Howard is the president of the dental school this year and treasurer of the Student Government Association. He was president of his class in his freshman, sophomore, and junior years. He has been elected a member of Alpha Sigma Chi, honorary dental society, and is highly regarded by his classmates. He received his BA from Emory and Henry in 1950.

The Delaware Valley Chapter continues to carry on its activities with great success.

New York Chapter

The Greater New York Chapter met on October 26 at the Hotel Delmonico with Dr. Bernard Disick, M'25, the president, as chairman. It was pleasant to see so many of the old familiar faces and to encounter some new ones.

The Richmond contingent consisted of Dr. and Mrs. W. C. Henderson, Dr. William F. Maloney, Dr. and Mrs. Beverley B. Clary, and the executive secretary. Dr. Henderson told the group of the activities of the Association and Dr. Maloney explained the new curriculum. There was a question and answer period afterwards, which always proves most interesting.

Elected to office for the new year were Dr. Antonio Acosta-Valardi, M'31, president; Dr. Richard D. Turin, M'44, and Dr. S. I. Dyckman, D'32, vice-presidents; and Dr. Granville M. Leaman, M'34, secretary-treasurer.

The Cap of the School of Nursing

In response to numerous requests from students and alumni for a MCV cap that might be laundered more easily and be standard in size and appearance, we are pleased to announce that such a design has been created. With the help of Miss Louise Wiedmer, a member of the faculty, and the designers of Bruck's Uniform Company, the cap is now made to lie flat for laundering purposes. The design also includes a perma-starch brim which retains its stiffness indefinitely. The cap design is as close to the original MCV cap in size and style as we could make it on the basis of our records and of conversations with graduates from many years back. Any change in the width of the brim over the past years has been due to production-line cutting by the manufacturer, a process which inadvertently added to the width year by year. The present cap, therefore, more closely approximates the original cap than those of recent years.

The regulation cap can be purchased from the school of nursing office for $2.25 or it can be ordered from the Bruck's Uniform Company, 387 Fourth Avenue, New York 16, New York, for $2.65; the difference in cost being due to shipping charges. Directions for laundering and setting up the cap are included with each order.

We have been told by alumni and students that this cap can be washed quickly and set in a jiffy. The following pictures illustrate the standard cap of the school of nursing.

new! **ROBANUL**™

glycopyrrolate,* Robins-1.0 mg.

new! **ROBANUL-PH**™

glycopyrrolate, Robins-1.0 mg.; phenobarbital (¼ gr.)-16.2 mg.

from A. H. Robins
first of the rigid-ring anticholinergics

stops pain, starts healing Using a chemotherapeutic application of the unique 'rigid-ring' molecular concept,[1] to achieve increased anticholinergic effectiveness, Robanul and Robanul-PH (with phenobarbital) hold new promise for ulcer patients. Within 90 minutes, they produce—and maintain for 6 to 10 hours—those nearly ideal pharmacologic healing conditions that spell prompt relief from ulcer pain and epigastric discomfort.[2]

Robanul shows an unsurpassed capacity for reducing gastric acid in volume **and** concentration.[3] And as an antispasmodic, it is particularly well-suited to treating duodenal ulcer since its most consistent spasmolytic effect has been noted in the gastric antrum.[4]

Beginning with the shape of its molecule Robanul is designed to assist more effectively with ulcer healing. Its active elements are built onto a five-sided ring that cannot vary appreciably in shape. With its reactive sites thus 'locked' at fixed atomic distances, Robanul molecules tend to fit more often the particular shape of the cellular cholinergic receptor sites in the g.i. tract. Biochemists theorize that it is this cellular selectivity that accounts for Robanul's predominantly gastrointestinal specificity, its anticholinergic potency, and its exceptionally low incidence of typical side effects.

Deans' Page

School of Dentistry

Dear Alumni:

The contributions of dentists as individuals and dentistry as a health service profession are often unique to the point of attracting national and world-wide attention. The history of dentistry is replete with examples such as the discovery of anaesthesia.

In modern times, the identification of war and accident casualties has assumed great importance. This was tragically brought to the attention of our nation in connection with the recent airplane crash near Richmond in which seventy-four Army recruits and three crew members lost their lives. Identification of the mutilated and burned bodies posed a problem of Herculean proportions. In the majority of these cases, identification was established only by securing dental records of the accident victims and correlating the recorded details with postmortem dental findings. This task required the tireless and skillful application of dental knowledge and techniques. Called to lend his talents to this task, Dr. John J. Salley, chairman of our department of oral pathology, served with such distinction that the United States Army bestowed upon him *The Outstanding Civilian Service Award* during a recent ceremony in the office of our president.

This is a heart-rending instance wherein a dentist, by positive identification of casualties, brought a measure of comfort to the bereaved families.

Dr. Salley is a dental graduate of MCV, class of 1951, and subsequently earned a Ph.D. degree in experimental pathology at the University of Rochester. He has been a member of our faculty since 1954. Our faculty joins in congratulating Dr. Salley on this highly merited recognition of national interest.

Sincerely,

HARRY LYONS, *dean*

School of Medical Technology

The school of medical technology held open house from 3:30 to 5 p.m., October 27, 1961. Over a hundred College people and other friends came to look over the new facilities located in the basement of Randolph-Minor Annex, at the corner of College and Broad Streets. Various phases of medical technology were illustrated by displays.

On *the left,* Phyllis Harrison, student; Dr. R. Blackwell Smith, Jr.; Dr. Henry G. Kupfer, director, and Miss Lena Thomas, technical director of the school of medical technology; and Janet Light, Susanne Northam, Barbara Holland, and Lucile Holswade, students.

New facilities for the school include a large laboratory, lecture room, lounge, two offices, library, instrumentation room, reception hall, locker room, and four storerooms. In the new quarters, the school will be able to admit 80 students each year, 40 in the March class and 40 in the September class. Students spend the first six months in lecture and laboratory and the second six months rotating through the hospital laboratories. Upon completion of the twelve months of training at MCV, an AMA approved school of medical technology, students receive the B.S. degree in medical technology. MCV students have made excellent records on the national registry examination of the American Society of Clinical Pathologists.

HENRY G. KUPFER, *director*

Students working in the new medical technology laboratory.

Dietary Department

The entire dietary staff sends their best wishes for the new year to all of you. We had a very lovely holiday season in our department and are looking forward to a good year in 1962.

Our dietetic interns had their annual two weeks vacation during the holiday season. They were all delighted with this arrangement.

Miss Phyllis Reynolds is back with us again. Some of you may remember her when she was here several years ago in charge of private patient food service. She is now in charge of our main kitchen. Miss Carmencita Gomez also returned in December after having left to take some courses at the University of Puerto Rico. We are delighted to have both of these former staff members back with us.

Lieutenant Colonel Kathleen Creech, U.S.A.F., Diet., 38, was one of our speakers for the State Dietetic Association Convention held at the Marriott Motor Hotel, Key Bridge, Washington, D. C. We are very proud of Kathleen. She has been assigned to the Surgeon General's office, U. S. Air Force.

Best Wishes, 1962

KATHRYN W. HEITSHU, *director*

School of Graduate Studies

With a total enrollment of 61, the school of graduate studies of the Medical College of Virginia is now larger than it has ever been. This reflects a recognition throughout the country of the importance of clinical medicine, and the welfare of patients depends upon an adequate supply of these basic medical investigators and teachers. The field of medicine is never static and new problems of diagnosis, treatment, and prevention of disease must be met by medical scientists equipped with the newest knowledge and committed to the deepest concerns for humanity.

Behind the doctor at the bedside stands the medical scientist ready to place in the hands of the doctor the necessary instruments of healing.

At the beginning of this new year, the school of graduate studies looks for-

(Continued on page 20)

A Report to the Alumni

(Continued from page 1)

Plans were made for the medical education building, envisioned as a structure which would permit the eventual enlargement of the entering medical class to approximately 128, or about 50 per cent; provide for the first time adequate teaching, laboratory, and office facilities for the clinical medical faculty; and permit bringing together in improved facilities several of the basic science departments. With the generous support of the General Assembly, supplemented by a Health Research Facilities Grant, the building was started last spring and should be occupied the latter part of this year.

During the latter years of the last decade, the College began to suffer the loss through death, disability, or retirement of the distinguished leaders of the clinical departments who had done so much to develop and advance the medical school since they were brought together by President Sanger in the early years of his administration. Again with the aid of generous appropriation increases provided by the General Assembly, the tremendous tasks of finding new chairmen and of bolstering the strength of these clinical departments through additional appointments have proceeded with a view toward the redevelopment of a clinical faculty adequate to the challenges and responsibilities of a medical school with an enrollment of approximately 500 students. All departmental and divisional chairmanships have been filled and some of the additional faculty members recruited.

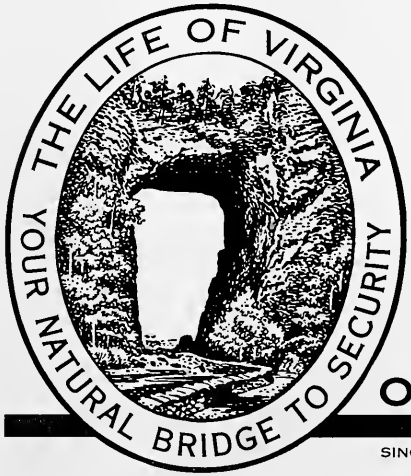
In the appointment of the new departmental chairmen the rules established some years ago by the Board of Visitors, patterned upon those universally followed in institutions of higher education, have been observed—the central requirement being that each such position be filled through the appointment of the best available candidate, based upon the judgement of a committee especially chosen for this purpose.

In every instance, special committees have been appointed and have conducted broad searches before arriving at their recommendations. We believe the years ahead will bring progress which will justify these recommendations. Meanwhile the process of welding into a unified faculty this large group of talented and highly qualified individuals of diverse backgrounds, some new and some old, must go on. Perfection in this process has never been achieved. Indeed, a group all of one mind seems less likely to make real contributions than one embracing individuals of diverse views, each willing to accommodate himself to the views of others when this is desirable in behalf of the greater good of institutional progress and usefulness.

Paradoxically, the medical school enrollment in 1961 reached a low point of 330 with 54 Virginians graduating as compared with a peak enrollment of 372 with 66 Virginians graduating in 1954. That this enrollment drop should occur at a time when substantially greater appropriations for both facilities and faculty support have been provided by the General Assembly may seem doubly strange to those unfamiliar with the facts behind the figures. A partial explanation lies in the expiration of the earlier mentioned West Virginia agreement and the obvious decrease resulting. However, the full significance of the West Virginia withdrawal lies in the fact that these students were entering the third year of the medical course after completing the first two years at Morgantown. No other applicants from two-year schools, Virginians or otherwise, are available to replace them in utilizing the capacity of our clinical educational facilities, which provide for an enrollment of in excess of 100 students in both the third and fourth years. The school takes each year its full capacity of 84 students in the freshman class, and the overall growth of the medical student body cannot reassert itself until the laboratories and classrooms of the medical education building and associated facilities are available to provide additional freshman and sophomore capacity.

In this connection, the admissions committee reports that no qualified Virginians have been denied admission to the medical school. As the number of qualified Virginians seeking admission increases, our enrollment of such students will grow; but the number cannot increase appreciably until the effects of the larger birth rate of the 1940's makes itself felt in increased numbers of graduates from the undergraduate colleges. Shortly thereafter our problem, hopefully, will be that of another deluge of applications. If Virginia is to have the physicians needed a decade hence, the State's total annual number of graduates will have to be increased by some 50 per cent, according to National estimates.

In this connection, a problem earlier brought to the attention of our alumni should be given serious thought. Throughout the country there has been in recent years a dearth of applicants as compared with the situation ten years ago. From an application-admission ratio of 10-1 then, the situation now is such that last year each applicant had a better than even chance of admission. Admittedly, this



THE LIFE
INSURANCE COMPANY
OF VIRGINIA
SINCE 1871 • RICHMOND, VIRGINIA

has come about in part, perhaps largely, because of the low birth rate of the 1930's; but we should not forget that there are many new, exciting, and satisfying career opportunities open in science which are now winning capable recruits, who would have turned automatically to medicine in earlier years. If we are to have our share of promising young people, we must redouble our efforts to attract them to medicine. Although the College must and will do everything it can through visits to colleges and other means, the medical practitioners can do perhaps more by seeking to interest and capture the imaginations of capable young people in their own communities.

For the past several years, efforts at curriculum improvement have been made in all our schools, with perhaps the largest and most intensive program of curricular study being carried out in the school of medicine. Support for the study underway in the medical school has come in generous measure from the Commonwealth Fund, the Old Dominion Foundation, and other sources. A large and representative group of the faculty recently agreed to the development of a proposed new curriculum. A major proportion of the work needed to produce this in a form for careful study and review remains to be done. Probably many months will be required before the proposal can be put in shape for review and debate by the faculty. No radical changes are imminent. The members of the faculty after thorough consideration may decide to adopt a modified plan of curricular organization, should they conclude that this will serve best to fulfill the obligations and responsibilities assigned them by the Board of Visitors.

There has been a good deal of interest in the research being carried out here at the College. We are proud that our people are acknowledging their obligation to productive scholarship and that in addition to their teaching duties many are seeking new knowledge which may aid in the prevention or treatment of human suffering. I am satisfied Virginians are not willing to let others assume our share of the load in seeking to carry forward the work of other and older investigators without whose discoveries the modern physician would be as relatively useless as the witch doctors of old.

Here as elsewhere, a healthy debate as to the degree of emphasis which research should be given may serve to keep in balance teaching and research—activities which in educational institutions must proceed hand in hand. Certainly there is better balance today than a quarter century ago when only a relatively small number of our people acknowledged the obligation to productive scholarship and many of these were unable to participate because of the pressure of other responsibilities.

Many members of our faculty, including men trained here in years past, feel that clinical instruction, far from falling prey to overemphasis on research, has continued to develop as regards quality, scope, and attention to organization of clinical teaching activities. This gives promise of the fulfillment of the primary mission of the school of medicine—the education of the finest possible physicians

at the conclusion of the formal, four-year curriculum, physicians who will then be able to choose for themselves the branch of medical practice to which they will devote their lives—a choice which is the birthright of free citizens in a democratic society.

Postgraduate training—that of our interns and residents—is an increasingly important factor in attracting young physicians to Virginia for permanent careers. The demand for appointments to our housestaff, from applicants throughout the country as well as among our own graduates, is an encouraging sign that this phase of our educational effort may help provide larger numbers of practitioners in Virginia.

The course of the College is forward, and there is evidence that the rate of development is reasonable. Further funds will be needed for the support of the enlarged faculty and facilities which our growing enrollment will require (See SCARAB, October, 1961, page 5). Most of all, we shall need your understanding, active support, and patience as we deal with the many problems which characterize a growing and developing institution.

The School of Nursing In Review

(Continued from page 5)

the associate degree program. Of the total number, including the dean, two hold doctor's degrees, fourteen hold master's degrees, and eleven hold bachelor's degrees. The school also employs full time a nutritionist as well as an instructor for the teaching of English subjects and an instructor for the special science course of the associate degree program. Each of these persons holds a master's degree in her respective specialty area.

Other general education subjects are taught by faculty from various departments of the Medical College, from Randolph-Macon College, the University of Richmond, and the Richmond Professional Institute of the College of William and Mary. These faculty members come to the college to teach on a part-time basis. We feel this plan contributes much to the school. Each course in the general education phase of both programs is geared to college teaching and is essentially the same course given on the home campus. Faculty in the general education areas assist the school further by serving on faculty committees, such as admissions and curriculum, and attend as many faculty meetings as possible.

Accreditation

Many persons have assumed that the programs of nursing education at the Medical College of Virginia have been nationally accredited. This has not been the case, particularly in recent years. As previously mentioned, the degree portion of the five-year program had never been nationally accredited and the basic four-year program did not become accredited until December, 1960. The achievement of this accreditation goal deserves special commendation and recognition, for it represents a monumental effort.

When the first class graduated in 1957, an application for accreditation review was forwarded to the National League for Nursing, who informed us that we were ineligible for such a review. A criterion established by NLN holds that no collegiate program is eligible for review by the accrediting group unless the college or university of which it is a part is accredited by the appropriate regional accrediting agency in general education. This meant that the Medical College of Virginia had to be accredited by and be a member of the Southern Association of Colleges and Secondary Schools. In the past, moreover, it had not been the policy of the Southern Association to accredit or accept into membership any college made up wholly of professional schools. Since each of the other professional schools making up the Medical College had been fully accredited by its respective national agency, there had been no reason previously to seek accreditation by the Southern Association. Students, faculty, and alumni of the school of nursing are extremely grateful to President Smith and all other administrative officers and faculty who ended this dilemma by

TUCKER HOSPITAL, Inc.

DR. STEVEN G. KARPATI

setting in motion the vast amount of inquiry, study, reporting, and interviewing which resulted in final success. In October, 1960, after an extensive survey of all schools of the college by a review committee of the Southern Association, the Medical College of Virginia became the first institution of its kind to be accredited by and admitted into membership of the Southern Association of Colleges and Secondary Schools.

It was now possible to move into high gear the necessary procedures for professional accrediting of the school of nursing by the National League for Nursing. Several months and many over-time hours later, the faculty completed an extensive report which described the various aspects of the school. In the fall of 1960, representatives of the National League for Nursing visited us. On December 23, 1960, we received news that all programs, including the public health nursing component of the baccalaureate degree program, had been fully accredited. With this recognition, MCV's school of nursing became the first school in the state to offer a fully-accredited public health nursing component of a collegiate program and the first in the state to offer a fully-accredited associate degree program. At the time we received our national accreditation, only seven of the thirty-three schools in Virginia, diploma and collegiate alike, were nationally accredited.

This achievement marks a milestone in our history and assures our graduates of eligibility to enter programs of graduate study, to participate in national scholarship funds available only to students enrolled in fully-accredited collegiate schools, to seek employment in certain positions where the accreditation of the home school is desired, and to be employed as fully-qualified public health nurses not only in Virginia but throughout the country.

We feel privileged to tell all alumni the story of the school of nursing from the beginning of its history in 1895 to its present stage in 1961. The history is long and full of accomplishments. Graduates of our school are located in all parts of the United States and in numerous foreign countries; many are contributing importantly to the health needs of Virginia.

No matter what we have accomplished in the past, we are still looking ahead to more avenues for development in the future, particularly in those areas where improved patient care can be emphasized. On the horizon are many exciting endeavors in which we hope the alumni will be our copartners. After all, it is for our students and our graduates that we exist; and it is through them that we hope to contribute to even better patient care.

Class News

(Continued from page 12)

rehabilitation at the VA Center in Kecoughtan, Virginia. He was recently certified as a diplomate of the American Board of Physical Medicine and Rehabilitation.

1932 Sally L. Ellison (Diet.), Richmond, Virginia, is listed in the "Who's Who in the South and Southwest." She is executive director of the Dairy Council of Richmond.

1933 Paul Hogg (M), of Newport News, Virginia, was elected president of the Virginia Society of Crippled Children and Adults at their last meeting on November 10, 1961. He also was elected a councilor for the Medical Society of Virginia.

Andrew Shapiro (M), of Roanoke, Virginia, is the new vice-president of the Roanoke Academy of Medicine.

1934 W. Fred Delp (M), of Pulaski, Virginia, is cochairman of the new Virginia Chapter of the Flying Pysicians. He was elected vice-president of the Southwest Virginia Medical Society and reelected a councilor from the Ninth District to the Medical Society of Virginia.

1935 Thomas C. Brodshaw (D), of Blackstone, Virginia, was named a fellow in the American College of Dentists.

1936 Leroy Smith (M), of Richmond, Virginia, was elected to membership in Alpha Omega Alpha, honorary fraternity, at their recent annual meeting.

1937 Julien H. Meyer (M), of Roanoke, Virginia, and his wife attended the Third World Congress on Gynecology and Obstetrics in Vienna in September.

R. Blackwell Smith, Jr. (P), of Richmond, Virginia, was named to a sixteen-man citizen's advisory committee by Welfare Secretary Ribicoff. They will recommend steps they believe the Food and Drug Administration should take to protect the public from harmful foods, drugs, and such items as cosmetics and therapeutic devices. He has also been appointed to the National Advisory Dental Research Council.

1938 Archie A. Hoffman (M), of Washington, D. C., was recently elected to membership in Alpha Omega Alpha, honorary fraternity.

1939 Dewitt C. Daughtry (M), of Miami, Florida, is the immediate past-president of the Southern Thoracic Surgical Association and will serve as president of its Council in 1962. He has been practicing thoracic and cardiovascular surgery in Miami and is associate clinical professor of surgery at the University of Miami.

Harold I. Nemuth (M), of Richmond, Virginia, spoke at the first workshop in 1961-62 series on The Nursing Management of the Patient with Long-term Illness.

Miss L. A. Shepherd, a resident pharmacist at MCV, attended the meeting of the Virginia Hospital Pharmacist's Society at Kecoughtan in October.

1940 Morris H. O'Dell (M), of Charleston, West Virginia, was elected secretary-treasurer of the West Virginia Thoracic Society at their meeting on October 11.

Joseph V. Turner (D), of Richmond, Virginia, was installed as president of the Richmond Dental Society on December 7.

1942 William Walton (M), of Pulaski, Virginia, was elected to the Executive Committee of the Southwest Virginia Medical Society.

Ralph M. Ware, Jr. (P), of Richmond, Virginia, attended the District II meeting of the Boards and Colleges of Pharmacy in Williamsburg, November 2-4.

1943M Dale Groom (M), of Charleston, South Carolina, was elected to membership at the annual meeting of Alpha Omega Alpha, honorary fraternity.

Clarke T. Richardson (P), of Mathews Court House, Virginia, and his wife recently visited her family in Puerto Rico.

1943D Thomas V. Goode, Jr. (M), of Statesville; North Carolina, wrote that his wife, the former Mary Louise Kellgrew, died on June 4, 1961, after an illness of six months. He has two children Charles Kellgrew, 11, and Mary Anne, 9.

1943M Alfonso J. Fressola (D), of Staten Island, New York, was the president last year of the Richmond County Dental Society. He has recently been elected to the Board of Trustees of the Second District Dental Society.

1944 Claude A. Frazier (M), of Asheville, North Carolina has been elected vice-president of the section on allergy of the Southern Medical Association. He was formerly secretary.

1945 Raymond S. Brown (M), of Gloucester, Virginia, is serving on the Board of the Francis N. Sanford Nursing Home.

Gerald W. Roller (M), and **Bernard F. Wittkamp, Jr.** (M), are at MCV as postgraduate fellows, who are NIAMD trainees.

Harold L. Smith (P), of Richmond, Virginia, who completed work on his Ph.D. in chemistry and pharmaceutical chemistry, is now in postdoctorate research at the school of pharmacy in Anne Arbor, Michigan.

1957 Shirley P. Shull (N), of Baltimore, Maryland, and her husband, Mark, announce the arrival of a daughter, Leslie Anne, on October 22, 1961.

Sarabeth Trinkle Walker (M), of Wilmington, Delaware, is limiting her practice to pediatrics after a four-year residency. She was married in June, 1958, to Dr. Charles Walker, Jr., who is an internist.

1958 Shirley Hartman (N) and Jack Odell, of Mather AFB, California, announce the arrival of John Browning, Jr., on July 9, 1961.

Lester Lamb, of Stuart, Virginia, became the new administrator of the R. J. Reynolds Patrick County Memorial Hospital, Incorporated, on November 1.

Marvin Sokol (M), of the 50th Tactical Hospital (USAFE) in Germany, and his wife sent a most clever announcement of the birth of their daughter, Janice Flora, on November 27, 1961.

1959 Barrett R. Bryant (P), of Danville, Virginia, and his wife, Nancy, announce the arrival of their son, Jeffrey Wilson.

Marilyn Bureau (PT), of Richmond, Virginia, was married on September 23, 1961, to William D. Morrison in Washington, D. C.

Robert W. Clements (D), of Indianapolis, Indiana, is attending Indiana State Dental School for postgraduate work.

Daniel L. Detwiler, Jr. (D), was married on July 22, 1961 to **Doris E. Bell** (N'60). They are living in Herndon, Virginia.

Joe Felts (P) and his wife Sammi, of Petersburg, Virginia announced the arrival of their daughter in the spring of '61.

John N. King (M) is serving with the Peace Corps at Dar es Salaamand and will work with the Tanganyika Ministry of Health.

W. Reynolds Legge, Jr. (M), and his wife, of Winston-Salem, North Carolina, announce the arrival of Withrow Reynolds, III, on August 29.

Richard Marx (P), of Roanoke, Virginia, and his wife announce the arrival of their second child, Richard, Jr., on November 14.

Nathan A. Safian (M) is a captain in the Army stationed in Germany.

1960 Jack B. Baugh (D), of North Tazewell, Virginia, completed the Medical Field Service School's orientation course at Brooke Army Medical Center, Fort Sam Houston, Texas.

Joyce Crauch (N) and **Katherine Hinchey** (N'61), of the MCV operating room staff, visited Johns Hopkins recently to observe procedures and techniques in open heart surgery.

William Sims Grabeel (M), of Richmond, Virginia was married on December 16 to Eleanor Ann Hook here. **Charles M. Graham, Jr.** (M'59), of Purcellville, Virginia, was his best man and **Waverly M. Cale** (M'54) and **Jimmie W. Farley** (M'60) were ushers.

Margaret S. Johnson (N) and her husband, of Springfield, Illinois, announce the arrival of Charles Sebastian on December 5, 1961.

Helen B. Savedge (P) and her husband, William, of Surry, Virginia, have a son, Anselm Randolph, born on September 7, 1961.

1961 Jenne Crutchley (N), of Richmond, Virginia, has been promoted to head nurse in the premature nursery at MCV.

Joseph Espinala, Jr. (D), of Tampa, Florida, recently completed the Medical Field Service School's orientation course at Brooke Army Medical Center, Fort Sam Houston, Texas.

John Flournoy (P) and **Charles Johnston** (P), resident pharmacists at MCV, attended a meeting of the Virginia Hospital Pharmacists Society at Kecoughton in October.

Basil (D) and **Ramona S.** (N'57) **Friend,** of "Tooth Acres," Route 2, Fries, Virginia, wrote that Basil, II, arrived on March 6, 1961; and Dr. Friend has just moved into his new office in the Fries Clinic.

Barbara Sue Guy (N) was married on October 7, 1961, to **Gary S. Morelack** (P). They are living in Dayton, Ohio.

Corbett R. Hyde (P), of Portsmouth, Virginia, has joined Eli Lilly and Company as a sales representative in his town.

William J. Maxwell, IV (D), of Florence, South Carolina, has completed the Medical Field Service School orientation course at Brooke Army Medical Center.

Nelsan St. Clair (HA) and his wife, Patti, of Newport News, Virginia, announce the arrival of a son on September 30, 1961.

Ray Smith (P) and his wife, of Richmond, Virginia, announce the arrival of their daughter, Bonnie Raye, on October 24.

Benjamin E. Wiggins, Jr. (D), of Washington, D. C., was married on July 1, 1961 to Miss Mary Lynn Mapp.

Lest We Forget

(Continued from page 11)

1951 Matthew Christopher Glynn, Jr. (M), of Portsmouth, Virginia, died August 25, 1961. He had served on the staffs of Riverside, Mary Immaculate, and Warwick Hospitals.

1961 Jessie Ryder Booth (N), Charlottesville, Virginia, was killed in an automobile accident while making home calls for the Instructive Visiting Nurse Association.

Deaths Sadden College

October brought much sadness to the College. On October 20, Dr. Jacques P. Gray, first full-time dean on the school of medicine at MCV, died; and on October 24, both Dr. Fred M. Hodges, emeritus clinical professor of radiology, and Dr. Frank L. Apperly, retired chairman of the department of pathology, passed away.

All three of these gentlemen had contributed much to the welfare and growth of the College and will be long remembered by our alumni.

New Fund Begun

A medical student loan fund has been established at MCV in memory of Dr. J. Raymond B. Hutchinson, M'30, of Arlington. Mrs. Hutchinson presented a check for $5,600 to the College to initiate this fund, the sum represented monies received in Dr. Hutchinson's memory through the Heart Association of Northern Virginia.

Faculty Changes

*indicates an alumnus of MCV

During the months of October, November, and December, there were new appointments as follows:

Appointments

Dr. Marvin J. Allison, assistant professor of clinical pathology.

Miss Joan Elizabeth Arnold, instructor in otology, rhinology, and laryngology (audiology)

Dr. Reneal C. Cobb, instructor in psychiatry

Mr. Robert Denzler, associate in hospital administration

Mrs. Jean Dickinson, clinical instructor in physical therapy

*Dr. Richard W. Dodd, clinical assistant in otology, rhinology, laryngology, hearing and speech

*Miss Frances R. Fernandez, assistant professor of public health nursing

Dr. Dorothy Gwendoline Fisher, instructor in psychiatry

*Dr. Llewellyn T. Flippen, instructor in denture prosthesis

Dr. Enrique Gerszten, assistant instructor in pathology

Mrs. Rhoda A. Maddox, instructor in biophysics and biometry

Dr. Eugene Makarowsky, instructor in psychiatry

Dr. Richard M. Meiller, associate professor of psychiatry

Dr. Charles Howard Newton, assistant professor of sociology

Dr. Donald P. Ogdon, associate professor of psychology

Dr. Nicholas M. Papadopoulos, associate professor of pharmacology

Dr. Juan M. Perdomo, instructor in anesthesiology

Dr. Charles B. Pratt, clinical instructor in pediatrics

Dr. Anibal A. Sanches-Salazar, assistant professor of anesthesiology

*Dr. Robert J. Scott, associate professor of medicine

Mr. Daniel Blosser Suter, teaching assistant in anatomy

*Mr. Alfred J. Szumski, assistant professor of physical therapy

*Dr. Charles Oscar Watlington, instructor in medicine

*Dr. George F. Winks, Jr., clinical instructor in medicine

Dr. Klara Yoe, instructor in medicine

*Dr. Sidney H. Zuber, assistant instructor in pathology

About The Cover

The deans and directors of the school of nursing are depicted on this issue's cover. You will also find an interesting article beginning on page two about their school. Shown in the picture from the left are: Miss Harriette A. Patteson, N'32, director of the associate degree program; Dr. Doris B. Yingling, dean of the school; and Miss L. Frances Gordon, N'43M, director of the baccalaureate degree program.

Hi Alums —

Has anything exciting been happening to you?

Been some place? Going some place?

Moving? (Bounced mail now costs us 8¢)

Made a talk anywhere? Gotten married?

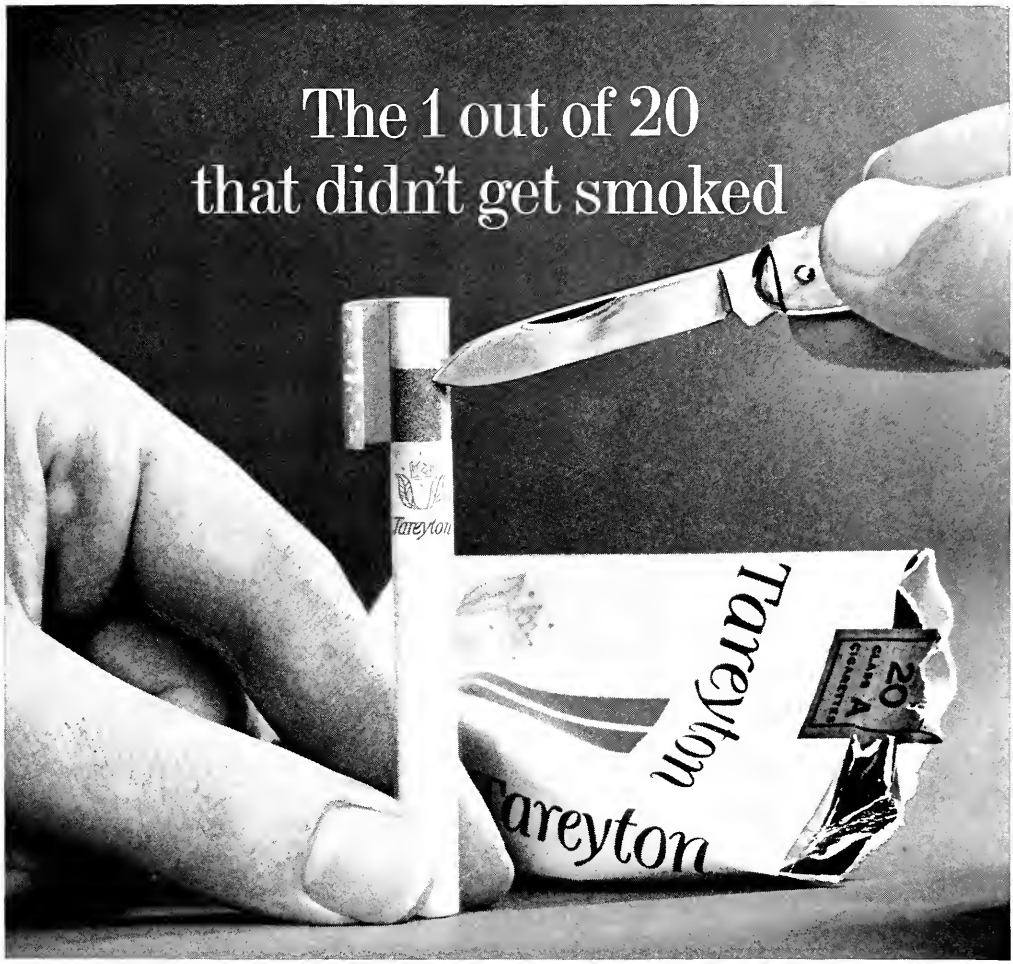
Had a baby? Been awarded an honor?

Elected to something? We'd like to know and so would the other alumni. So tear this out and scribble in below and mail it to the Alumni Association of MCV, 1105 East Clay Street, Richmond, Virginia.

Name _____ Address _____

School and Year _____ _____

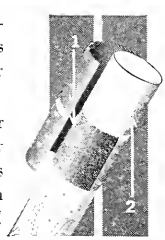
The 1 out of 20 that didn't get smoked



There's a lot of satisfaction in pointing out something good to a friend. That's why it sometimes happens that one cigarette out of a pack of Dual Filter Tareytons never does get smoked.

People open it to show its remarkable Dual Filter containing Activated Charcoal. They may not know why it works so well, but they do know this: It brings out the *best* taste of the *best* tobaccos. Yes, Tareyton delivers the flavor . . . and the Dual Filter does it!

Try a pack of Dual Filter Tareyton. We believe the extra pleasure they bring will soon have you passing the good word to your friends.



Tareyton delivers the flavor...
DUAL FILTER DOES IT!

HERE'S HOW: 1. It combines a unique inner filter of ACTIVATED CHARCOAL . . . definitely proved to make the taste of a cigarette mild and smooth . . .

2. with a pure white outer filter. Together they select and balance the flavor elements in the smoke. Tareyton's **flavor-balance** gives you the best taste of the best tobaccos.

DUAL FILTER **Tareyton**
